Labs *(1 hour - take home)*

Using the same code base

- Create a Dockerfile for the code base
- Run a Docker build
  - Use docker build action
- Run a security check against the docker image
  - Use snyk for docker
- If the security check passes, push the image into Docker hub
  - Create a Dockerhub account
  - Use Docker login action
  - Use Docker push action
- Run a deployment to Heroku
  - Create a Heroku account
  - Use Heroku Github action
